Practical Information

**INTOSAI**

### Dear Colleagues

I am pleased to send you the third newsletter, informing you of forthcoming XXII INCOSAI activities and information. As we are moving forward towards the 22nd INCOSAI in Abu Dhabi the count down to the event has started.

We are working tirelessly and cooperatively to insure that the conference we are hosting is beneficial to all participants. The aim revolves around having the best quality minds working hand in hand in improving our overall understanding and comprehension of the matters at hand. We believe that this congress is an opportunity for all of us to communicate and share knowledge, a standing stone in our organization.

In this newsletter, we hope to update you on the technical latest news and deadlines, tell you a bit more about the new exciting things we are preparing for the 22nd INCOSAI and to inform you on registration process and procedures.

# Technical Updates:

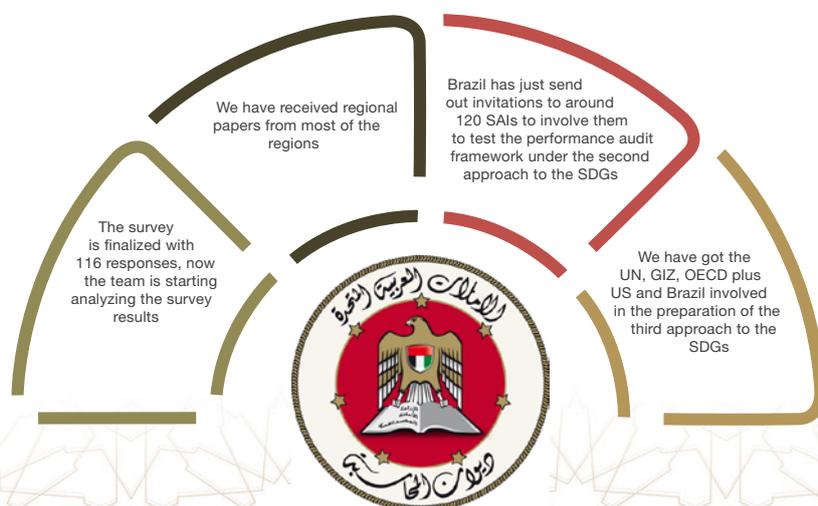

Since the last newsletter we have continued our preparation for the themes at the XXII-INCOSAI.

We have been working to finalize SAIs responses to the survey. (118 responses received). Many SAIs have used the opportunity to add comments to their questions. The response to the survey has given us a good basis to understand the INTOSAI communities' views on the how we can contribute to the UN 2030 Agenda and on the Sustainable Development Goals-SDGs as well as the professionalization of INTOSAI. We have also received the regional response to the two themes for the Congress in form of regional papers. The regional response is very positive and give us a good foundation to get the regional perspective included in the theme papers for the Congress.

Over the next couple of months the two theme papers for the Congress will be prepared in close cooperation with all the involved parties e.g. theme

chairs, moderators, rapporteurs, regions and the think tank on SDGs. We plan to distribute the two theme papers in the five INTOSAI languages by the beginning of November 2016.

In regard to theme I on how INTOSAI can contribute to the implementation of the SDGs we can say that a lot of activities are going on around our community. During this month the UN High Level Political Forum-HLPF will meet in New York to discuss the follow-up and review of the SDGs. INTOSAI has been given a chance to organize and host a side event at the HLPF meeting to discuss with relevant partners at the UN how SAIs can contribute to ensuring that "no one is left behind" in the implementation of the SDGs. In addition, IDI and KSC hosted a meeting to discuss their capacity development program on 'Auditing Sustainable Development Goals'. The program aims at supporting SAIs in conducting high quality audits of implementation of SDGs.

# Something New:

In our endeavors this INCOSAI to gather the most important information and to canvas the opinions of individuals that might have some interesting views on our themes, analyze their input and evaluate if their input is actually useful to our themes. Therefore, we have set up social media accounts on:

Facebook

Instagram

Youtube

Twitter

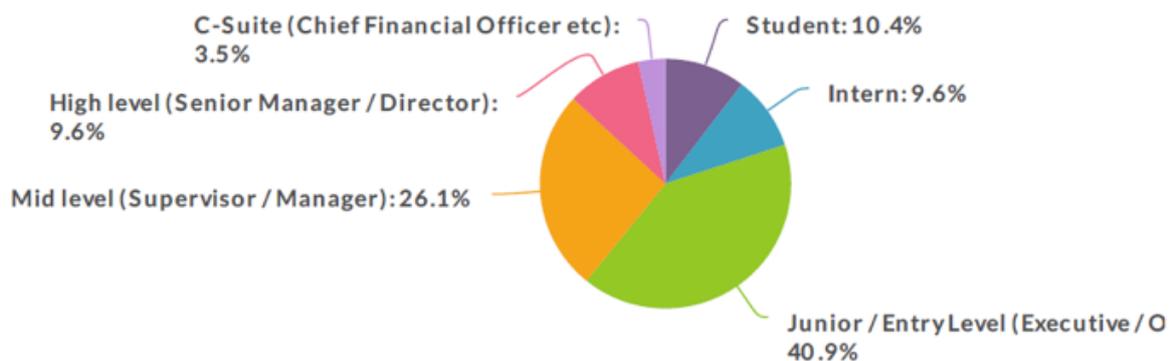

Link IN

So far, we have been asking interesting questions and posting posts that intrigue discussion and explores areas of interest in public sector. In our efforts to have a well thought and reliable research; we have created a social media survey, by posting this survey we got around 300 participants and some interesting results. For example, most of the people who participated were from the government and private sector, they were surprisingly from the younger generation. The youth is with no doubt very active in issues that

relate to public sector such as audit, governance and fighting against corruption. They offered many interesting responses to the questions raised.

In the coming period we are going to push the survey for more demographic coverage and to collect further beneficial responses to our themes. To participate in the survey or to have some suggestions, please follow this link. With Your participation we make a difference!

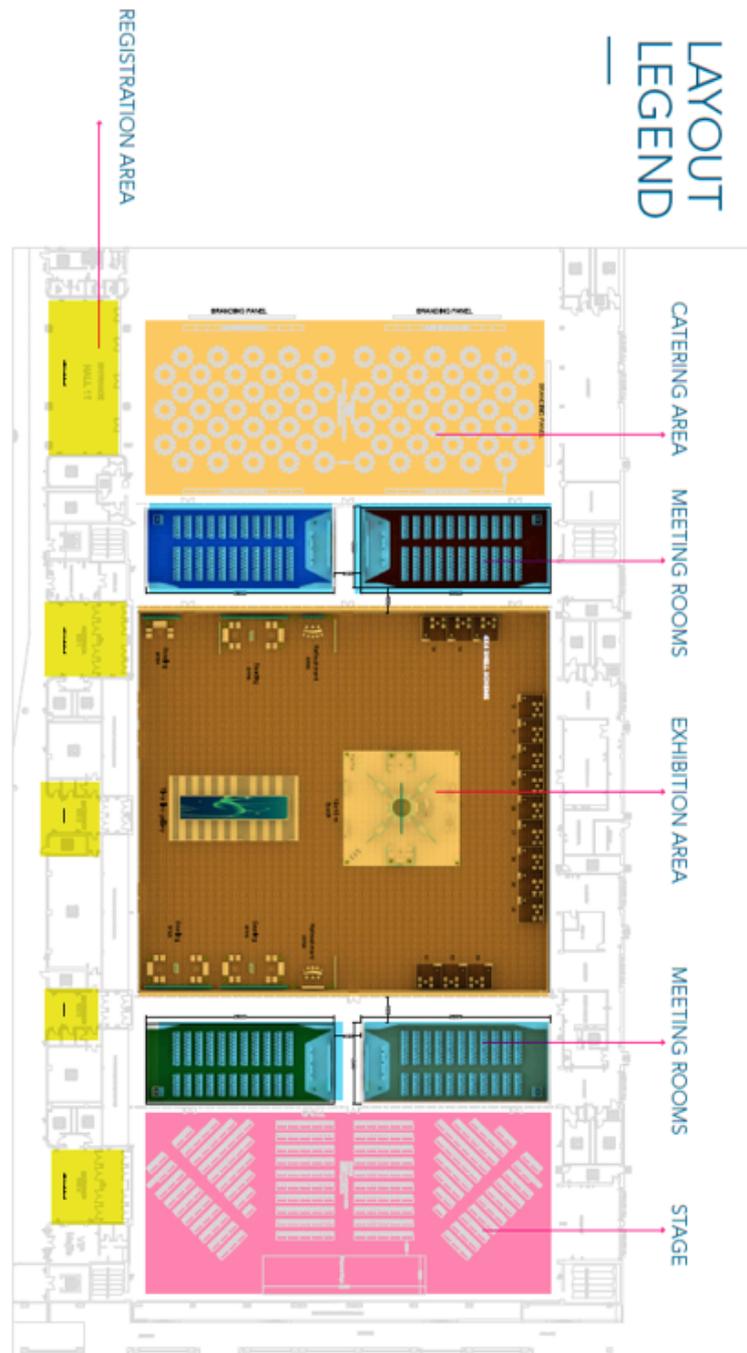

# Exhibition Area:

One of the main goals we set for our XXII INCOSAI is to highlight the act of knowledge sharing, promote networking, give more space for dialogue and interaction with stockholders and have an interactive experience during this congress. Therefore, we are introducing a new technique to the exhibition in our INCOSAI, which is to have seminars in the booths.

To achieve that, we are offering all participants who are interested an opportunity and logistical support on site to handle their booth and conduct their seminars. The participants are free to choose the subject of their seminar whether it is to update interested participants in a certain area of their work or to introduce new findings and topics for discussion. To that purpose, we have created an electronic form where participants can choose, size, equipment and technological requirements for their space in the exhibition. We defiantly encourage all interested participants to take this initiative and request a booth. We have dedicated a full have day in the agenda to serve this purpose. If you haven't already, please follow this link to request a space.

We are insuring that the participants are well equipped during the time of the exhibition, find bellow a floor plan of the event. We have dedicated needed logistics and technologies to have a smooth sailing, easy to navigate conference and exhibition area.

So far we have had around 15 requests and are expecting more interactive participation. In the next newsletter, we will share with you a more detailed agenda for the half day assigned for the exhibition activities.

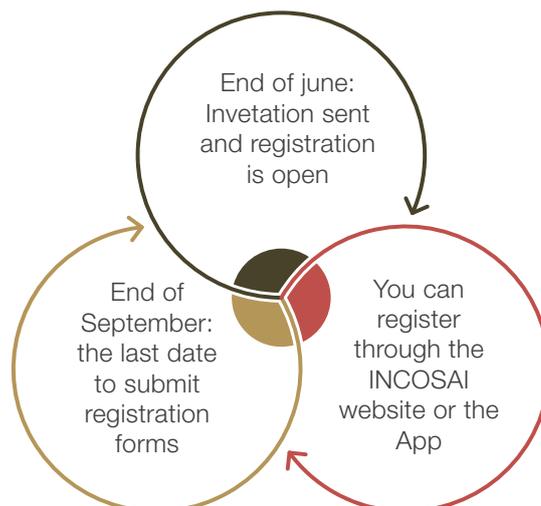

# Important Information:

The invitation for the 22nd INCOSAI have gone out during last week, as we are moving ahead, it is essential that our fellow colleagues start registering for the event. As of (date of invitation) the online registration channels have been activated, you can either register through the website or through the app we have designed specifically for INCOSAI ([www.incosai2016.ae](http://www.incosai2016.ae)).

You can download the app through the Apple store or Android play store on your tablet or smartphone by just searching (INCOSAI 2016) in both mediums you can register, view documents and agenda, live stream, access recommended hotel information and tourist information's as well. it is vital that participants register as soon as possible to insure that we have all needed information well before to manage logistical and make sure that your experience in the United Arab Emirates be as comfortable as possible. Find bellow registration work flow through the website or the app.

All of these measures were taken to insure that our guests have an informative and valuable professional experience, as well as, a smooth sailing logistical trip.

## WORK FLOW for XXII INCOSAI 2016

ICNOSAI Website:
