CBC Work Plan 2020 – 2022

Peer-to-peer cooperation (SAI the Netherlands)[1]

Strategic objective (as per SP 2017-2022)	Strategies and initiatives (as per SP 2017-2022 and work stream TOR)	Performance / progress indicator	Key initiative / action items, timing and risks
Identify capacity development challenges and opportunities in order to facilitate access to solutions including accessing the INTOSAI-Donor Cooperation **[INTOSAI Strategic Objective 2.1]** Share capacity development insights and ensure responsiveness to SAI needs through, for example, communities of practice **[INTOSAI Strategic Objective 2.4]**	Support and promote medium to long term peer-to-peer cooperation between SAIs in support of institutional capacity development **[CBC Key Strategy #9]** through: • Encouraging INTOSAI members to share their experiences of peer-to-peer cooperation through blogs and articles on the CBC website, the INTOSAI Journal and elsewhere; • Creating opportunities to exchange experiences of peer-to-peer cooperation; • Gathering and sharing information about peer-to-peer cooperation through the CBC website and otherwise; • Identifying and sharing good practice in peer-to-peer cooperation; • Promoting the use of peer-to-peer cooperation	Good practice in peer-to-peer cooperation identified and shared	Activities (2020-2022): • Further develop the INTOSAI CBC/P2P webpage as a landing page for knowledge sharing around P2P cooperation. This could include (but not exhaustive) an overview of experienced providers and their areas of expertise, tools and resources, market place for P2P cooperation (e.g. share training seats, search for junior partners, requests for secondment etc.). • Explore opportunities to capture *and* repurpose existing insights and best practices on P2P cooperation in blogs and articles on the CBC website, the INTOSAI Journal and elsewhere. • Coordinate a follow-up P2P capacity building workshop[2]. Key risk(s): • CB providers unable/unwilling to share information, knowledge and repurpose existing insights and best practices. Mitigating action: (a) experienced providers will be approached on an individual basis to contribute; (b) continue to demonstrate the relevance/usefulness of the work.
		The number of SAIs engaged in P2P cooperation increased [*baseline not available*]	Activities (2020-2022): • Identify interested new (or less experienced) peer-to-peer providers. • Coordinate a training event for interested new (or less experienced) P2P providers[3]. • Coordinate the development of a P2P Cooperation Guide[4] (based on the project cycle) with a select number of providers (including new P2P providers) by using the Book Sprint methodology. Key risk(s): • Resource limitations to organize the Book Sprint and Training Event. Mitigating action: (a) encourage members to identify resources; (b) participants will be asked to contribute to the costs of the events.

[1] The NCA has a maximum of 45 working days per year available to chair and coordinate this work stream.

[2] SAI Norway indicated their interest to take the lead in this workshop.

[3] IDI plans to do a training along those lines in the PAP-APP phase 2 (probably in 2020/latest in 2021) and can open it up to SAIs which are not part of PAP-APP but are interested in the training.

[4] Similar as the Peer Review Guide.
